## The first and only luxury, sustainable pool material.

ReNew is a high-performance, luxury pool film made with 51% pre-consumer recycled content.

ReNew uses cutting-edge UV and anti-microbial additives, coupled with vigorous testing for weldability, chlorine and abrasion resistance resulting in sustained material brilliance.

### FEATURES

**SUSTAINABLE** reduces plastic waste

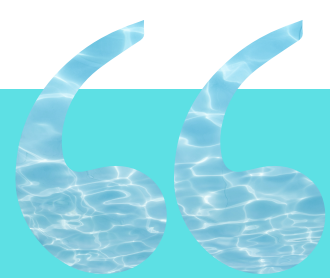

**CERTIFIED** independently certified

**NON-POROUS** smooth surface

**PERFORMANCE** uv. chlorine & abrasion

**FRESH** anti-microbial additives

**INNOVATIVE** brilliant colors and design

TESTED, TRUSTED, PERFORMANCE:

ReNew is the sustainable choice for your backyard.

### How It's Made SUSTAINABILITY BUILT-IN

Unlike fiberglass and concrete pools, which rarely contain sustainable ingredients and are difficult to impossible to recycle, ReNew pool film makes vinyl liners an easy choice. Pool films made with ReNew Technology are certified by SCS Global Services, a world class leader in third-part certification, validation and verification for environmental, sustainability and quality performance.
